**SWITCH AND DATA SELECTS FMX SOLUTIONS TO EXPAND ITS ASSET  
MANAGEMENT PLATFORM TO PALO ALTO AND NEW YORK CITY**

*FMX Solutions helps leverage Switch and Data customer service operations*

**TAMPA, FL., July 26, 2006** – FMX Solutions Inc. today announced an agreement with Switch and Data, a leading provider of colocation, interconnection and Internet exchange services, to integrate its Palo Alto and New York 111 8<sup>th</sup> data centers into its Building One database, increasing infrastructure management efficiency and ultimately customer satisfaction. FMX Solutions provides high-end engineering services related to IT infrastructure management as well as Facility Management thanks to processes and methods that use state of the art software such as Building One or w-BMC.

The BuildingOne solution has been deployed by Switch and Data in 2001, supporting the company in operating 20 of its sites in the United States and Canada, with the capability to manage them from a single database. With FMX Solutions integrating the two company's flagships, Switch and Data's technical and sales support staff will be able to access all of Switch and Data's assets, infrastructure, cross-connects, zoning, leasing and other facility data from a single database as well as manage new projects within all of its sites.

“The expansion of our BuildingOne database to our Palo Alto and New York City 111 8<sup>th</sup> data centers will provide the infrastructure necessary to enhance customer service in North America,” said Charlie Browning, Vice President of Operations at Switch and Data. “This agreement with FMX Solutions will make our data centers more efficient with improved asset capacity management and increase the quality of service for all of our customers.”

As part of Switch and Data's data centers – where access, networking, application and infrastructure services exist together in one marketplace – the database expansion will enable the company to optimize its entire infrastructure.

“I strongly believe that by choosing FMX Solutions, Switch and Data will continue its leadership in the colocation industry,” said Xavier Bougot, President of FMX Solutions. “It will allow the company to expand management of all of its sites within one single database for better consistency and return on investment. Integration of newly acquired sites will also be faster allowing customers to benefit from the Switch and Data infrastructure almost instantly”.

**About FMX Solutions.**

FMX Solutions ([www.fmxsolutions.com](http://www.fmxsolutions.com)) is a consulting and engineering firm. Its mission is to satisfy customers seeking to optimize usage of premises and inside and outside plant.

FMX Solutions "traditional" CAFM services focus on improving asset and space utilization and rationalizing property management. IT services cover design and engineering validation, infrastructure assessment and moves, adds and changes management.

For outside plant design and maintenance (of particular interest to the ITS industry, telecommunications operators and the like), FMX Solutions provides a global solution that not only supports the design of transportation network infrastructure, but also helps clients to manage the network's day-to-day operation.
