

FMX Solutions presents Building One at ITS America 2006

FMX Solutions will showcase the BUILDING *One* asset management tool at the ITS America 2006 Annual Meeting. Visit Booth #108 for more information.

Montreal, April 12, 2006 – FMX Solutions Inc., a facility, cable, and network design and management service provider, announced that it will present its BUILDING *One* asset management application on the Siemens ITS booth during the ITSA America 2006 annual meeting and exposition in Philadelphia May 6th to May 9th 2006.

BUILDING *One* is an object-oriented, GIS software capable of managing such diverse aspects of inside and outside plants as cabling and fiber infrastructure, building layout and space allocation, voice and data networks, automatic patching schedules, moves-adds-and-changes, asset-tracking, occupant positions, desktop equipments and connectivity, charge-back billing calculations, telephone directories, traffic management devices, inventories, M&E equipment and operations manuals, inter-building cabling, and project simulations.

The BUILDING *One* database system provides a powerful and coherent software system for designing and managing all aspects of an ITS installation (traffic control centers, field equipment and assets, fiber optic and copper cabling, microwave links, etc). It also serves as a dynamic tool for clients who must manage the day-to-day operations of these networks.

The solution provides customers with up-to-date documentation of the various phases of the design, and offers the ability to use the same database for other departmental information (inside and/or outside plants). In this way, it will help reduce related to infrastructure and operations.

FMX Solutions has partnered with Siemens ITS to better serve the ITS community.

About the Intelligent Transportation Society of America

The Intelligent Transportation Society of America (ITS America) is the leading advocate for ITS development and deployment in the United States. ITS America was established in 1991 as a not-for-profit organization to foster the use of advanced technologies in surface transportation systems. Members include corporations, public interest groups, universities and research laboratories, and government agencies at all levels. ITS America works closely with the U.S. Department of Transportation in support of the National ITS Program and serves as an invaluable resource to its members in the areas of technology, domestic public policy, international relations, and business development. For more information, visit www.itsa.org.

About FMX Solutions.

FMX Solutions is a consulting and engineering firm. Its mission is to satisfy customers seeking to optimize usage of premises and inside and outside plant.

FMX Solutions "traditional" CAFM services focus on improving asset and space utilization and rationalizing property management. IT services cover design and engineering validation, infrastructure assessment and moves, adds and changes management.

For outside plant design and maintenance (of particular interest to the ITS industry, telecommunications operators and the like), FMX Solutions provides a global solution that not only supports the design of transportation network infrastructure, but also helps clients to manage the network's day-to-day operation.
